

Bioengineering

- This is our field of interest
- Our interests will cover only bioengineering sector and all the solutions (e.g., technological solutions) for this field

Open Source

- Our dream is to help people for free
- All the contents that we will propose through BMI are open source. We will always make every effort to ensure that everything we make is at least made with extremely low-cost tools

Innovation

- We want to promote faster progress in the biomedical engineering field
- We want to promote the activity of young dreamers who want to found their own businesses. We want to help them with what we have already designed and developed and with what we will design and develop

Modularity

- We want to make our contributes assemblable
- We will strive to create content so that it can be used in a modular and assemblable way

Community

- What powers the BMI project is people
- Anyone willing to contribute to this project can enter our community. You will not need degrees of who knows what kind, as long as you are intellectually interested in the subject and want to work on it. Contact us to find out more. The more we create a network, the more concreteness we give to the dream

Consulting

- The community can always stay in touch with young entrepreneurs
- We do not only want to help young business ambitions, but we are also willing to accompany them towards success
